1.0 INTRODUCTION

The J&W Drum Service Site (Site) is located at 1121 Allene Avenue in Atlanta, Georgia. The Site is approximately $\frac{1}{4}$ acre in size and once operated a drum recycling facility and pallet shop that reclaimed RCRA-empty containers. The owner of the facility stopped operations in 2002; however, drum and tote manufacturing labels dated 2004 were found at the site. The owner also stated that he only cleaned and reconditioned drums from the food and beverage industry. An Atlanta fire department became aware of the site through a citizen's complaint. The Atlanta Fire Department subsequently referred the Site to the Emergency Response and Removal Branch (ERRB) for more action.

On June 22, 2004, EPA On-Scene Coordinator (OSC) Karen Buerki was dispatched to the site to investigate a discharge of an unknown liquid to a storm drain. The one story building roof had collapsed on the drums, containers, and totes remaining in the warehouse. Also the dilapidated building foundation was leaking, enabling rainwater to wash the discharge to the city's Combined Stormwater Overflow (CSO) which ultimately flowed to a Publicly Owned Treatment Works (POTW) facility.

WRS was issued Emergency Response Task Order F4-0020 under ERRS contract number 68-S4-02-06 on June 24, 2004, for the ceiling amount of \$200,000. An additional \$35,000 was added in a modification bringing the total ceiling to \$235,000. WRS was tasked to respond and repair or patch the building foundation to prevent future release during rainfall events, secure the site, remove the collapsed roof, manage and secure the drums and containers that contain hazardous substances, sample, categorize, and consolidate the waste from these drums and containers.

2.0 SUMMARY OF ACTIVITIES

On Wednesday, June 23, 2004, PM Brown met OSC Buerki to survey the Site and discuss the activities, materials, equipment, supplies, and personnel required to perform the Task Order Statement of Work (SOW). As directed, PM Brown commenced pre-mobilization activities to procure the supplies, materials, and equipment required to repair or patch the building foundation to prevent future release during rainfall events, secure the site, remove the collapsed roof, and manage and secure the drums and containers that contained waste materials.

On Friday, June 25, 2004, WRS PM Brown, Foreman Wolfe, and Laborers Martinez and Cutino mobilized to the Site to commence Site operations. Upon mobilization, WRS personnel set up temporary facilities at a vacant lot across from the J&W Drum Site which included portable toilets, storage trailers, and EPA's Mobile Command Post. WRS site personnel cleared vegetation and segregated debris from the front of the facility and began removing and staging empty drums that were easily accessible and not under the collapsed roof. The leak in the side of the building was patched to prevent contaminated water from running into a storm drain on Warner Street. WRS received approval to close a section of Warner Street, which runs along the side of the building, and utilized this area for empty drum storage and load out. Debris and trash were loaded into roll-off containers for off-site disposal.

A Transportation and Disposal (T&D) services Invitation for Bid (IFB), Bid # 104120-001, was prepared and issued to three qualified bidders. The bids were received and evaluated by the WRS PM with OSC notification and concurrence provided to contract with the low bidder, Greenleaf Environmental Group Inc. The T&D bid was for transportation and disposal of RCRA empty containers and for disposal of debris from the building. During the compliance check performed by the EPA, the selected landfill (Pine Bluff Landfill) and the RCRA empty Drum destruction facility (Greenleaf) were both found to be approved to accept CERCLA wastes. The bids were received on June 24, 2004.

On July 1, 2004 WRS removed a section of the roof that was unstable and was located near the entryway of the building. The section was removed using heavy equipment and loaded into roll-offs for disposal. The roof section was removed to protect workers from overhead collapsing hazards and to help access drums located inside the building. As access was gained in parts of the building unstable, sections of the roof were removed and loaded into roll-offs. Drums from under the removed roof were then destacked and staged in appropriate locations.

Standing water from inside the building was pumped into empty drums from the site for future disposal. Tanks were also delivered to the site to store water and other bulked liquid. Drums containing greater than 1 inch of liquid were staged for sampling and Hazardous Categorization performed by the EPA START contractor (Tetra Tech). The drums were then divided into waste groups and bulked into shippable containers. The individual waste groups were then sampled for waste profiling and disposal purposes. Due to storage of waste on-site, the EPA OSC requested that a fence be erected around the building. Rock was delivered to the site and a driveway was made in front of the building for truck access.

Approximately 2,000 RCRA-empty containers were removed from the warehouse, manifested, and transported to Greenleaf Industrial Services in Macon, Georgia for destruction. Visibly impacted soils were excavated and contained in a lined roll-off pending data analysis. Upon receipt of analytical data, the waste soils were removed from the Site and disposed of in a Subtitle D landfill.

Drum sampling results were received from the laboratory and an IFB for drummed and bulk waste, Bid # 104120-002, was prepared and issued to three qualified bidders. The bids were received and evaluated by the WRS PM with OSC notification and concurrence provided to contract with the low bidder, The Environmental Quality Company. The bid was awarded on September 18, 2004.

After completion of sampling and field characterization activities, the facility was pressure washed and the resulting material was contained in rental tanks staged on-site. The existing waste material drums were consolidated to minimize the total number of waste containers.

The OSC provided consent to proceed with T&D activities in late April 2005. A site visit was scheduled with the T&D subcontractor in early May. During this site visit, it was discovered that additional areas of the roofing had collapsed, limiting access to various waste drums that had been staged under wooden shelving located in the facility. WRS secured the proper equipment needed to remove the collapsed roofing and safely access the waste drums.

Waste stream pickup was scheduled to begin on May 9, 2005. The Environmental Quality Company (EQ), the T&D subcontractor, arrived on-site with a vacuum truck and two empty tankers to load out the bulk waste stream non-regulated aqueous liquids. Another truck from EQ arrived to load the additional waste streams that were contained in drums. During the pumping of the non-regulated waste stream, 2 drums were found to contain sludgy material that was too thick to pump. Since the drum pickup had been completed and the truck was gone from the Site, these two drums were manifested and loaded out by EQ on May 11, 2005. The large rental tank and one of the small 600-gallon tanks were removed from the site that day as well. Eighteen (18) 55-gallon and three (3) 5-gallon pails remained in the warehouse following completion of the pumping of the bulked waste stream. These RCRA-empty containers were removed from the warehouse, manifested, and transported to Greenleaf Industrial Services in Macon, Georgia for destruction on May 18, 2005. The remainder of the small rental tanks were removed on this date as well. The Site was demobilized following the removal of the rental tanks.

3.0 TRANSPORTATION AND DISPOSAL

WRS awarded the transportation and disposal services of the drummed and bulk waste streams to The Environmental Quality Company (EQ) and the RCRA-empty containers, empty listed-waste containers, mercury containing lights, waste soils, and site debris to The Greenleaf Environmental Group. Each was selected based low apparent cost quote and technical ability to perform all requested tasks. WRS consolidated 8207 gallons of non-regulated aqueous liquids and disposed of 5 drums of non-regulated high-BTU organic liquids, 1 drum of non-regulated low-BTU organic liquids, 18 drums of non-regulated sludges, 4 drums of non-regulated solids, 2 drums of flammable organic liquids, 1 drum of flammable organic sludges, 1 drum of hazardous waste organic liquids, 4 drums of hazardous waste aqueous liquids, 1 drum of PCB Ballasts, 3 drums of caustic liquids, 5 drums of acidic liquids, 2022 RCRA-empty containers, 27 drums of

empty U134 waste, 1 drum of empty F006 waste, 260 mercury containing lights, 20.9 tons of non-regulated soil, and 184.71 tons of non-regulated debris.

Greenleaf Environmental destroyed and recycled the RCRA empty containers at CMAC Industrial and disposed of debris at the Waste Management Pine Bluff Landfill. Some of the empty containers previously contained materials that would not allow the containers to be considered RCRA empty. These drums were shipped as "Empty Drums Previously containing F006 plating waste" and "Empty Drums previously containing hydrofluoric acid".

Description	EPA Waste Codes	Quantity	Unit of Measure
Non-regulated Soils	None	20.90	Tons
Non-regulated Debris	None	184.71	Tons
RCRA-empty Containers	None	2,022	Containers
U134 Empty Containers	U134	27	Drums
F006 Empty Containers	F006	1	Drum
Mercury containing lights	None	260	Lights
Non-regulated Aqueous Liquids	None	8207	Gallons
Non-regulated High-BTU Organic Liquids	None	5	Drums
Non-regulated Low-BTU Organic Liquids	None	1	Drum
Non-regulated Sludges	None	18	Drums
Non-regulated Solids	None	4	Drums
Flammable Organic Liquids	D001, D007, D008	2	Drums
Flammable Organic Sludges	D001	1	Drum
Hazardous Waste Organic Liquids	D018	1	Drum

Hazardous Waste Aqueous Liquids	D007	4	Drums
Acidic Liquids	D002, D007	5	Drums
Caustic Liquids	D002	3	Drums
PCB Ballasts	None	1	Drum

4.0 HEALTH AND SAFETY

WRS personnel adhered strictly to the Site Specific Health and Safety Plan as prepared by the WRS Corporate Health and Safety Officer. There were no health and safety incidents on site.

5.0 PROBLEMS AND RESOLUTION

WRS encountered no major problems while performing removal operations on the J&W Drum Site. Security at the site became a problem. A fence was installed around the property to secure the materials that were stored in the building.

6.0 FINANCIAL SUMMARY

As stated in Section 1 of the report, Task Order F4-0020 was issued with a ceiling of \$235,000 for the specified scope of work. There were a total of five modifications as follows: modification 0001 provided a new Statement of Work (SOW) and extended the period of performance to September 30, 2004; modification 0002 extended the period of performance to January 31, 2005; modification 0003 extended the period of performance to April 30, 2005; modification 0004 increased the ceiling from the \$200,000 to \$235,000; and modification 0005 extended the period of performance to June 24, 2005. No provisional rates were established. After receiving OSC consent to subcontract, WRS awarded the transportation and disposal services of the hazardous and non-regulated wastes to The Environmental Quality Company and the transportation and disposal services of the waste soils, waste debris, RCRA-empty containers, listed-waste empty containers and the recycling of the mercury containing lights to The Greenleaf Environmental Group. Subcontracted services were selected based on the low apparent cost quote and technical ability to perform all requested tasks.

Description	Vendor	Cost Of Services	Percent of Total Cost
RCRA-empty and Listed-waste empty containers disposal services; mercury containing lights recycling service; waste soil and debris disposal services	The Greenleaf Environmental Group	\$54,032.38	24.07 %
Regulated and non-regulated waste disposal services	The Environmental Quality Company	\$ 6,092.21	2.70 %

These procurements were competitively bid as required by the Contract and in accordance with the Federal Acquisition Regulations (FAR) with appropriate notification and consent received prior to execution.

The projected Final Cost for the Task Order is \$ 224,481.20, recognizing a balance of funding for de-obligation of \$ 10,518.80. A detailed cost breakdown for this Task Order is provided in Appendix A. The current summary of the project financials through April 4, 2006 is as follows:

TO #	Obligated Ceiling	Deobligated Funds	Cumulative Personnel	Cumulative Equipment	Cumulative OFCs	Pending Total	Cumulative Total	% of Ceiling
F4-0020	\$ 235,000	\$ 0	\$ 83,536.76	\$ 6,914.64	\$134,029.80	\$ 0	\$224,481.20	95.52 %

Atlanta Federal Center, 11th floor
61 Forsyth Street, SW
Atlanta, Georgia 30303

Dear Ms. Buerki;

In accordance with Section J, Attachment F-1, the CERCLA Off-site Disposal Report for the J&W Drum Site, Task Order number 0020 under contract number 68-S4-02-06 is enclosed with this correspondence. In addition, this letter contains the completed disposal information, including a waste generation report, copies of all signed manifests with weight tickets.

I appreciate your time and attention regarding this matter. If there are any questions or comments concerning this report, I may be contacted at (770) 446-0002.

Sincerely,

A handwritten signature in black ink, appearing to read "Mark Bicksler".

CERCLA OFF-SITE DISPOSAL REPORT

Information Required for CERCLA Off-site Waste Management Activities.

1. Superfund Site name/State/CERCLIS SSID number: **J&W Pallet and Drum site
1121 Allene Avenue
Atlanta, Georgia 30310
EPA ID# GAD984310797**

X Removal
Remedial

Fund-financed
 PRP-financed

3. Type (check one) and form (check one) of waste; if more than one type, attach separate sheets for this and remaining questions for each type:

Type:

Form:

- solvents
- dioxins/furans
- cyanides
- heavy metals
(specify metals)
- acids
- PCBs
- halogenated organics
- other RCRA-listed hazardous Wastes(F008)
- non-hazardous or de-listed

- wastewater
- liquid waste
- organic sludge
(> 1% total solids)
- inorganic sludge
(< 1% total org. carbon)
- contaminated soil
and debris
- X solid or solidified

- #### 4. Quantity of waste:

cubic yard (CY)
 gallons (gal)
1881 drums

141 totes
_____ lab packs
_____ roll-offs

5. Range, average, and/or representative concentrations of the contaminants of concern:
None

6. Pre-treatment of waste before transportation: **NONE**

precipitation
 solidification
 stabilization

7. Receiving RCRA facility name/location/I.D. number/units:

Greenleaf Treatment Services
100 Waste Research Drive
Macon, Georgia 31206
EPA ID#: GAR000007484

8. Receiving Region: **4**

9. Receiving Region Off-site Contact (RROC): **Jack Cowart**

10. Date (s) of shipments:	Date	Manifest Number	Line Item	Quantity
	7/02/04	20001	11a	317 drums
	7/06/04	20002	11a,b	224 drums
	7/08/04	20003	11a,b	310 drums
	7/09/04	20004	11a,b	228 drums
	7/12/04	20005	11a,b,c,d	437 drums
	7/14/04	20006	11a,b,d	28 drums
	7/14/04	20006	11b	48 totes
	7/15/04	20007	11a	55 totes
	7/23/04	20008	11a	36 totes
	7/23/04	20009	11a,b,c,d	274 drums
	7/27/04	20010	11a,b,c	42 drums
	7/27/04	20010	11d	2 totes
	5/18/05	20011	11a	6 drums
	5/18/05	20011	11b	12 drums
	5/18/05	20011	11c	3 drums

11. Pre-treatment of waste at site before final treatment or disposal: **None**

12. Final method of treatment or disposal/unit receiving:

precipitation neutralization
 incineration landfill
 land treatment injection
 recovery/re-use other (Fuels Blending)

13. Cost of activities:

Total T&D Cost \$ 35,334.60

1241 55-gallon drums @ \$17.85/ drum
610 15- to 30-gallon drums @ \$12.60/ drum
141 275- to 320-gallon totes @ \$36.75/ tote
30 5- to 10-gallon drums @ \$7.35/ drum

CERTIFICATE OF DISPOSAL

Dear Valued Greenleaf Customer:

Enclosed is your original manifest from your recent waste disposal load. The manifest document number is 20011 and date of disposal is May 19, 2005. Please keep this document with your environmental records. If you have any questions, please feel free to contact us if you have any questions. We appreciate your business and hope we can further service all of your environmental needs.

Reference Work Order #**5055064523**

CERCLA OFF-SITE DISPOSAL REPORT

Information Required for CERCLA Off-site Waste Management Activities.

1. Superfund Site name/State/CERCLIS SSID number: **J&W Pallet and Drum site**
1121 Allene Avenue
Atlanta, Georgia 30310
EPA ID# GAD984310797

Removal
 Remedial

Fund-financed
 PRP-financed

3. Type (check one) and form (check one) of waste; if more than one type, attach separate sheets for this and remaining questions for each type:

Type:
 solvents
 dioxins/furans
 cyanides
 heavy metals
(specify metals)
 acids
 PCBs
 halogenated organics
 other RCRA-listed hazardous
Wastes(F008)
 non-hazardous or de-listed wastes

Form:
 wastewater
 liquid waste
 organic sludge
(> 1% total solids)
 inorganic sludge
 contaminated soil
and debris
 solid or solidified

4. Quantity of waste:

cubic yard (CY)
 gallons (gal)
 drums

184.71
~~185.01~~ tons
 lab packs
 20 roll-offs

5. Range, average, and/or representative concentrations of the contaminants of concern:

None

6. Pre-treatment of waste before transportation: **NONE**

precipitation
 solidification
 stabilization

neutralization
 fixation
 other()

7. Receiving RCRA facility name/location/I.D. number/units:

**WM- Pine Bluff Landfill
13809 E. Cherokee Drive
Ball Ground, Georgia 30107
EPA ID#: Non-applicable**

8. Receiving Region: **4**

9. Receiving Region Off-site Contact (RROC): **Jack Cowart**

10. Date (s) of shipments:	Date	Manifest Number	Line Item	Quantity
	6/30/04	10001	11a	8.21 tons
	6/30/04	10002	11a	6.34 tons
	7/01/04	10003	11a	11.36 tons
	7/02/04	10004	11a	13.89 tons
	7/06/04	10005	11a	7.90 tons
	7/06/04	10006	11a	10.77 tons
	7/06/04	10007	11a	7.34 tons
	7/08/04	10008	11a	8.80 tons
	7/08/04	10009	11a	4.05 tons
	7/09/04	10010	11a	13.69 tons
	7/09/04	10011	11a	9.47 tons
	7/12/04	10012	11a	5.15 tons
	7/13/04	10013	11a	11.88 tons
	7/14/04	10014	11a	8.25 tons
	7/15/04	10015	11a	5.64 tons
	7/15/04	10016	11a	6.45 tons
	7/20/04	10017	11a	10.38 tons
	7/20/04	10018	11a	11.24 tons
	7/26/04	10019	11a	13.11 tons
	7/28/04	10020	11a	11.09 tons

11. Pre-treatment of waste at site before final treatment or disposal: **None**

184.71

12. Final method of treatment or disposal/unit receiving:

<input type="checkbox"/> precipitation	<input type="checkbox"/> neutralization
<input type="checkbox"/> incineration	<input checked="" type="checkbox"/> landfill
<input type="checkbox"/> land treatment	<input type="checkbox"/> injection
<input type="checkbox"/> recovery/re-use	<input type="checkbox"/> other (Fuels Blending)

13. Cost of activities:

Disposal & Trans Cost: \$81.44 /ton
Total T&D/ ton Cost: \$ 81.44/ ton
Total T&D Cost (185.01 tons)\$ 15,067.04

184.71
